Symposia topics

Dear colleagues and friends,

© Tina Hagedorn

the upcoming EPHAR conference will host a total of 40 talk sessions (symposia and short talks). In addition, the conference will have a poster session and offer short-talk sessions to any topic in pharmacology.

The organizers plan an industry exhibit and lunch industry symposia. Three plenary lectures hosted by EPHAR, ASPET and BPS will constitute the scientific highlights of the conference.

Speakers will be announced in due course. Scientific partner societies will contribute symposia as well. The conference will be integrative and cover basic and clinical pharmacology. The conference proceedings will be published in leading pharmacology journals.

The conference will provide junior pharmacologists ample opportunities to showcase their work and will include a special social program for young people including a job fair.

The social evening will provide ample opportunities for scientific exchange in a relaxed manner including a classical music concert by the Camerata of the German Physicians Philharmonic Orchestra (Bundesärztephilharmonie).

Selected symposia of general interest will be open to the public.

Mark you calendar now and plan to attend this top-notch international event in centrally located Frankfurt.

I look forward to welcoming you in Frankfurt!

Sincerely yours

Roland Seifert
Congress chair

- Advances in pain pharmacology and therapeutics
- Artificial intelligence in pharmacology
- Biosimilars: clinical pharmacology and pharmacoeconomics
- Biotechnology approaches in modern pharmacology
- Career opportunities in pharmacology
- Catastrophe pharmacology
- Cyclic nucleotides as drug targets
- Drug cardiotoxicity
- Gender and sex pharmacology
- G-protein-coupled receptors
- History of pharmacology: focus on DGP and BPS
- Immunopharmacology
- Longevity pharmacology and healthy aging
- Molecular modelling and drug design
- Natural products
- Neurodegenerative diseases: AD and PD
- New drugs of the year 2026
- Pharmacology and society
- Pharmacology in special populations (pediatric, pregnant, and elderly patients)
- Pharmacology of atrial fibrillation
- Pharmacology of itch
- Pharmacology of obesity
- Pharmaco-microbiomics: microbiome, drug interactions and therapeutic potential
- Risk-benefit assessment of new drugs
- RNA therapeutics
- Scientific integrity in pharmacology
- Teaching pharmacology
- The next generation of pharmacologists: training, skills, and career development
- Vaccines for infectious and malignant diseases

You will soon find all further information about EPHAR online: submission of abstracts, registration fees, program and much more.

Don't miss any updates and sign up for the newsletter to stay up to date on the congress.
